

TRIAx STRUCTURES

Triax Structures offer a cost effective solution in providing supported shade and waterproof overhead coverage to your outdoor area.

The unique coupling system that allows two steel pipes to be joined at any angle on site without welding and offers flexibility with design & installation to suit most site applications.

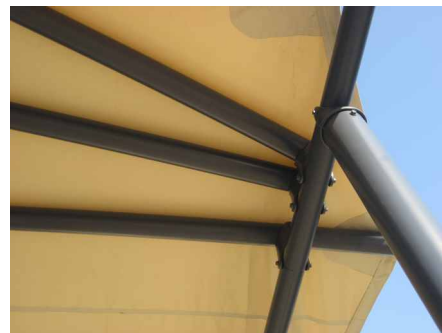

Triax system is light weight in construction using high grade tensile steel pipe and cast metal fittings. The product is available free standing with support posts or cantilever style with wall to post support.

Covers are available in commercial grade shade cloth or architectural design waterproof PVC.

Applications for **Triax structures** providing shade protection from harmful ultra violet rays.
